

RETHINK. RESET. RECYCLE.

The County's recycling program must be changed in order to address unprecedented processing costs. We all must focus on high-value items like plastic bottles/jugs, metal cans, and cardboard.

In the past, we typically **received \$6** for every ton of recyclables processed, but now, due to increased processing costs and weaker markets, we are forced to **pay \$85** per ton. The County must focus on high-value recyclable items to avoid a \$232,489 annual cost increase. This is a local, state, and nationwide problem that requires us all to **rethink and reset how we recycle.**

Recycle only these high-value items:

Clean flat cardboard up to 3'x3'
(NO PIZZA OR CEREAL BOXES)

#1 and #2 plastic bottles and jugs (e.g. water and soda bottles, milk and laundry jugs, etc.) and metal cans

#1 and #2 plastics will have these symbols on the container

Do not place any other items such as **GLASS, PLASTIC BAGS/CONTAINERS/WRAP** in the bins.
When in doubt, throw it out!
